Homework

Homework Exercises:

- You will make a ten-minute presentation in class about your model (seven minutes of talking and three minutes for questions).

Notes on Homework:

There will not be time to go into all the details in your presentation, so focus on:

- the big question you were addressing,
- a short description of the approach you took to answer it using an agent-based model,
- what you learned from running the model.

See the project assignment sheet for details.
