## Homework

### Homework Exercises:

- Turn in a written report about your research project. Your report should follow the model of a research report for *Science* magazine:

### Notes on Homework:

Your report should have the following structure:

1. Abstract (1 paragraph summary of the paper, focusing on highlights)
2. Introduction
  - Research question and why it's interesting
3. Methods
  - Describe the model you started with and how you changed it to answer your research question
  - Describe the experiments you ran with the model.
  - Describe what outputs you measured
4. Results
  - What did you see (graphs of output, pictures of turtles on patches, etc.)
5. Discussion, conclusions:
  - What did you learn from the results of your experiment?
  - If you had more time, what would you do next with your model?
  - Do you think these results point to possible uses for your model?
6. References

See the assignment for further details.
