Homework	1
Structure:	1
General recommendations:	1
Schedule of Presentations	2

Homework

Homework Exercises:

- You will make a five-minute presentation in class about your model (You can use the full five minutes of talking and there will be an additional two minutes for questions).

Notes on Homework:

There will not be time to go into all the details in your presentation, so focus on:

Structure:

1. Start by describing your research question
2. Briefly describe your model
3. Describe the experiments you performed:
 - What outputs did you observe or measure?
 - What parameters did you change?
 - What did you see? (e.g., behaviorspace graphs or screenshots of the model)
4. Conclusions

General recommendations:

- 5 slides, one minute each.
- As much as you can, use figures (graphs, illustrations, images, etc.) instead of text.
- Avoid slides with a lot of text

You can't say everything you did, so focus on the most interesting highlights.

You can describe what you did in greater depth in your paper.

Schedule of Presentations

TBA

Monday Dec. 1	Wednesday Dec. 3
